**DIVIDING DECIMALS WORKSHEET (ADDING ZEROES) #1**

---

**Directions:** Find the quotient of the following decimals. Each of the problems has a remainder. So, you will have to add a decimal point and one zero to the dividend to figure out the final quotient.

Example:  $1.5 \overline{)2.1}$   $\begin{array}{r} 1 \\ 15 \overline{)21.0} \\ \underline{-15} \phantom{0} \\ 6 \phantom{0} \end{array}$  If there's a remainder add .0 to the dividend  $1.5 \overline{)21.0}$   $\begin{array}{r} 1.4 \\ 15 \overline{)21.0} \\ \underline{-15} \phantom{0} \\ 60 \\ \underline{-60} \\ 0 \end{array}$  Keep dividing until there's no remainder

---

1)  $1.6 \overline{)10.4}$

2)  $2.2 \overline{)53.9}$

3)  $1.8 \overline{)6.3}$

4)  $1.5 \overline{)3.3}$

5)  $1.4 \overline{)11.9}$

6)  $1.2 \overline{)7.8}$

7)  $1.6 \overline{)10.4}$

8)  $2.5 \overline{)13.5}$

9)  $0.18 \overline{)2.79}$

10)  $0.16 \overline{)5.36}$

11)  $0.22 \overline{)27.17}$

12)  $0.15 \overline{)2.64}$
