**DIVIDING DECIMALS WORKSHEET (ADDING ZEROES) #3**

**Directions:** Find the quotient of the following decimals. Each of the problems has a remainder. So, you will have to add a decimal point and one zero to the dividend to figure out the final quotient.

Example:

\[
\begin{array}{c}
4 \div 5 = 0.8\\
\hline
21.0 - 20 = 1.0 \\
20 - 20 = 0 \\
\end{array}
\]

If there's a remainder add .0 to the dividend.

Keep dividing until there's no remainder.

1) \(15 \div 63\)  
2) \(18 \div 99\)  
3) \(10 \div 67\)  
4) \(16 \div 40\)

5) \(20 \div 142\)  
6) \(24 \div 156\)  
7) \(12 \div 30\)  
8) \(25 \div 120\)

9) \(22 \div 77\)  
10) \(16 \div 72\)  
11) \(10 \div 52\)  
12) \(12 \div 78\)
