DIVIDING DECIMALS WORKSHEET (ADDING ZEROES) #1

Directions: Find the quotient of the following decimals. Each of the problems has a remainder. So, you will have to add a decimal point and zeros to the dividend to figure out the final quotient.

Example:

$\begin{array}{r} 5 \\ 4 \overline{)21} \\ \underline{-20} \\ 1 \end{array}$	<p>If there's a remainder add .0 to the dividend</p>	$\begin{array}{r} 5.2 \\ 4 \overline{)21.0} \\ \underline{-20} \downarrow \\ 10 \end{array}$	<p>Keep adding zeros until there's no remainder</p>	$\begin{array}{r} 5.25 \\ 4 \overline{)21.00} \\ \underline{-20} \downarrow \\ 10 \downarrow \\ \underline{-8} \\ 20 \\ \underline{-20} \\ 0 \end{array}$
