

Name _____

FRACTION ADDITION #2

Directions: Find the sum of the following fractions. Write your answer in the space provided. If necessary, simplify your answer and write it in lowest terms.

Examples: $\frac{1}{6} + \frac{3}{6} = \frac{4}{6} = \frac{2}{3}$

$\frac{10}{18} + \frac{1}{18} = \frac{11}{18}$

1) $\frac{5}{8} + \frac{2}{8} =$ _____

2) $\frac{1}{9} + \frac{2}{9} =$ _____

3) $\frac{6}{10} + \frac{2}{10} =$ _____

4) $\frac{7}{20} + \frac{5}{20} =$ _____

5) $\frac{18}{25} + \frac{4}{25} =$ _____

6) $\frac{4}{7} + \frac{1}{7} =$ _____

7) $\frac{1}{3} + \frac{1}{3} =$ _____

8) $\frac{20}{50} + \frac{30}{50} =$ _____

9) $\frac{11}{33} + \frac{20}{33} =$ _____

10) $\frac{1}{15} + \frac{4}{15} =$ _____

11) $\frac{1}{4} + \frac{2}{4} =$ _____

12) $\frac{15}{20} + \frac{3}{20} =$ _____

13) $\frac{5}{8} + \frac{0}{8} =$ _____

14) $\frac{4}{10} + \frac{4}{10} =$ _____

15) $\frac{250}{300} + \frac{49}{300} =$ _____

16) $\frac{17}{25} + \frac{3}{25} =$ _____

17) $\frac{1}{100} + \frac{1}{100} =$ _____

18) $\frac{1}{9} + \frac{5}{9} =$ _____

19) $\frac{6}{32} + \frac{2}{32} =$ _____

20) $\frac{0}{9} + \frac{0}{9} =$ _____
