Area of a Parallelogram #5

Directions: Find the area of parallelogram. The formula to calculate the area of a parallelogram is 
\[ \text{Area} = \text{the width of the base} \times \text{the vertical height} \]. Write your answer in the space provided.

1) \[ \text{Area } = 18 \text{ in} \times 40 \text{ in} = \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \]

2) \[ \text{Area } = 15 \text{ in} \times 31 \text{ in} = \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \]

3) \[ \text{Area } = 7 \text{ in} \times 90 \text{ in} = \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \]

4) \[ \text{Area } = 36 \text{ in} \times 13 \text{ in} = \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \]

5) \[ \text{Area } = 32 \text{ in} \times 14 \text{ in} = \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \]

6) \[ \text{Area } = 26 \text{ in} \times 24 \text{ in} = \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \]

7) \[ \text{Area } = 81 \text{ in} \times 12 \text{ in} = \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \]

8) \[ \text{Area } = 27 \text{ in} \times 33 \text{ in} = \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \]

9) \[ \text{Area } = 25 \text{ in} \times 40 \text{ in} = \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \]
